## H1.1 Glossary of Japanese Terms

Approved by the Kodokan.

Japanese is one of the most difficult languages in the world for translating due to its complexity, and the fact that many aspects of the language are not present in English. Differences in the written English of many words is due to the transliteration style of the Japanese language. In judo books and other published materials, we can find different versions of the same word e.g., kumi-kata and kumikata.

In each box the word/text on top is from the original SOR glossary and below is the word/text as it is in the Kodokan dictionary (Kōdōkan, New Japanese - English Dictionary of Judo, 2000). If there is only one word/text it is the same in both reference documents.
