Sport Summit

Collaboration over Competition
Focusing on business in sport

www.lpevents.net

a quick introduction -

The Sports Summit was created so that intimate and meaningful conversations can happen around the business of sports. We felt that at large conventions, National Sporting Organizations were just not able to make true connections with sponsors, vendors, and sports organizations. Being able to be in a more intimate setting will help you engage colleagues and experts in areas that may assist your organization.

Collaboration over competition is crucial in this world now with a main focus on business in sports. Sports networking events provide a platform for like-minded individuals to come together, share their passion for sports, and build a sense of community. By participating in these events, you can connect with people who share your interests and values.

Topics That Will Be Covered

- Able Body Athlete Experience
- Disabled Athlete Experience
- Media Relations
- Panel Discussions
- Professional Vendors
- Risk Management
- Social Media
- Sponsorship and Grants
- Government Relations/Funding
- Tech Talk
- Venue
- Volunteer Management

And More...
